Περίληψη Πρόσκλησης:	<p><u>ExpectedOutcome:</u> Accelerated deployment of climate services to build climate resilience. Better informed climate adaptation policy response, stronger adaptive capacity and climate resilience in Africa, with a focus on the Sub-Saharan region. Improved synergies between adaptation action and other policy objectives, notably the Sustainable Development Goals agenda. Contribution to the international dimension of the EU Adaptation Strategy and to the Africa-EU Partnership. Knowledge base to underpin major international scientific assessments such as the IPCC Assessment Reports.</p> <p><u>Scope:</u> The African continent is on the frontline of the climate emergency; it is highly vulnerable and adaptation to both present and future impacts of climate change is urgent and crucial to secure its long-term resilience and prosperity but it is challenging in the current economic context. While the demand for high-quality, actionable climate information and services is growing, there is a need for more holistic, better connected, more interactive and more user-oriented approaches across the entire adaptation value chain from knowledge production to users. This ranges from improved knowledge base, through increased accessibility, up to enhanced uptake of information and climate services by end-users spanning policy makers, governmental agencies, local authorities, civil society and the private sector. The focus of this topic is on countries in Sub-Saharan Africa – given the region's limited response capacities coupled with high vulnerability to climate change impacts that range from droughts, through rising sea levels, cyclones, and floods to rising temperatures and rainfall anomalies with serious implications, notably, for food and water security.</p> <p><u>This call covers the following topics:</u> - HORIZON-CL5-2023-D1-01-01: Further climate knowledge through advanced</p>

Περίληψη Πρόσκλησης:	<p><u>Project results are expected to contribute to all of the following expected outcomes:</u> Routes of exposure, linked to ecosystem and biodiversity dynamics to chemicals are better understood, Issues raised by the contamination of biodiversity in the natural environment are better known, including risks linked to existing contaminations (legacy), chemicals of emerging concern and accumulations in nature, Environmental fate of new chemicals of emerging concern is better understood, Toxicological and ecological impacts of contaminants are better understood and risk assessments for relevant highly exposed species are strengthened, Prevention and mitigation measures are identified and developed.</p> <p><u>Scope:</u> According to IPBES global assessment report[1], pollution is one of the five main direct drivers of biodiversity loss. This topic focuses on chemical pollution, which has been increasing in the last decades with key differences by region and by type of pollution. Quantitative assessments include systematically monitored variables with certain emissions into the atmosphere, water bodies and terrestrial systems from industrial activities and households. However, pollution has and is still changing not only in quantitative but also qualitative terms and the monitoring of many dangerous substances, including ones of emerging concern, and knowledge on the way they impact biodiversity and ecosystem services are missing. This topic aims at better understanding the routes of exposure and toxicological and ecological impacts of chemical pollution (excluding industrial contamination) on terrestrial biodiversity and ecosystems[2] (Area A). According to the EU biodiversity strategy for 2030, pressures include the release of nutrients, chemical pesticides, pharmaceuticals, hazardous chemicals, urban and industrial wastewater and other waste including litter and plastics.</p> <p><u>This call covers the following topics:</u> - HORIZON-CL6-2023-BIODIV-01-1: Better understanding of routes of exposure and</p>

Περίληψη Πρόσκλησης:	<p>Virtual exchanges projects consist of online people-to-people activities that promote intercultural dialogue and soft skills development. They make it possible for every young person to access high-quality international and cross-cultural education (both formal and non-formal) without physical mobility. While virtual debating or training does not fully replace the benefits of physical mobility, participants in virtual exchanges ought to reap some of the benefits of international educational experiences. Digital platforms represent a valuable tool in partially answering the global constraints on mobility caused by the COVID-19 pandemic. Virtual exchanges also help spreading European values. Moreover, in some cases they can prepare, deepen and extend physical exchanges, as well as fuel new demand for them. Virtual exchanges take place in small groups and are always moderated by a trained facilitator. They should be easily integrated into youth (non-formal education) projects or higher education courses. Virtual exchanges can draw participants from both sectors, even if, depending on specific projects, they could involve participants from either only one of them or from both. All projects under this call will involve organisations and participants coming from both EU Member States and third countries associated to the Programme, and third countries not associated to the Programme in eligible regions.</p> <p>OBJECTIVES OF THE ACTION</p> <p>The action will aim to:</p> <ul style="list-style-type: none">- Encourage intercultural dialogue with third countries not associated to the Programme and increase tolerance through online people-to-people interactions, building on digital, youth-friendly technologies;- Promote various types of virtual exchanges as a complement to Erasmus+ physical mobility, allowing more young people to benefit from intercultural and international experience;- Enhance critical thinking and media literacy, particularly in the use of internet and social media, such as to counter discrimination, indoctrination, polarization and

violent radicalisation;

- Foster the digital and soft skills development of students, young people and youth workers, including the practice of foreign languages and teamwork, notably to enhance employability;

- Promote citizenship and the common values of freedom, tolerance and non-discrimination through education;

- Strengthen the youth dimension in the relations of the EU with third countries.

Περίληψη Πρόσκλησης:	<p>European Youth Together projects aim to create networks promoting regional partnerships, to be run in close cooperation with young people from across Europe (EU Member States and third countries associated to the programme). The networks should organise exchanges, promote trainings (for instance for youth leaders) and allow for young people themselves to set up joint projects, all of which can be done through both physical and online activities.</p> <p>OBJECTIVES OF THE ACTION</p> <p>European Youth Together projects aim to create networks promoting regional partnerships, enabling young people across Europe to set up joint projects, organise exchanges and promote trainings (e.g. for youth leaders) through both physical and online activities. The action will support transnational partnerships for youth organisations from grassroots level to large-scale partnerships, aiming to reinforce the European dimension of their activities, including on how to live better together and helping to design sustainable future ways of living, in line with the European Green Deal and the New European Bauhaus initiative.</p> <p>Important thematic priorities are working with and promoting the EU Youth Goals and, in general, the EU Youth Strategy 2019-2027. The European Youth Goals are also reflected in the President von der Leyen Commission's political guidelines. Project proposals may also treat the themes of the 'Conference for the Future of Europe'. The European Parliament elections in 2024 are relevant in the context of this action. Young people and youth organisations are key actors in the recovery from the COVID-19 pandemic. Youth networks should consider ways of forging solidarity and inclusiveness, and how to improve quality of life after the pandemic, which concur with challenges related to digital skills and sustainable green lifestyles.</p>
